Late Prof. Dr. Türkan Saylan, the legendary President and founding member of the Association for Supporting Contemporary Life (ÇYDD), believed that the most important problem in Turkey is providing equal educational opportunities for boys and girls and keeping the country secular...Girls’ education is one of the smartest and single most cost-effective investments we can make in our homeland Türkiye. In 2000, United Nations established the Millennium Development Goal#3 to promote gender equality and empower women based on the notion that access to education is a basic human right and is a significant factor in reducing poverty and in improving the quality of life for young women and girls and their communities.

Your generous support, together with the work of Bridge to Türkiye, will help marginalized girls in Türkiye realize their dreams.

Please join BTF through its collaboration with ÇYDD to contribute to creating lasting positive change in Türkiye by empowering these young women with an opportunity to develop into productive citizens. Now is the time to step up our efforts to bridge the gender gap in education, empower marginalized women, and help them give back to their communities through a simple gift of scholarships for academically gifted but economically disadvantaged girls and young women.

Please give a gift today and BTF will leverage your support to transform the futures of rural young women and girls and strengthen communities in Türkiye.

Thanks for believing that we really can make a difference!

Sincerely,

Bridge to Türkiye Fund
